

PURSALITE

# Introducing PursaLite™, for People on the Go!

Use PursaLite™ in All your  
Favorite Beverages

### Liquid Conversion Technology

With a simple stir (5-10 seconds) of The PursaLite, say goodbye to bitterness and harshness and hello to an incredibly smooth and vitally improved beverage.

### How does it Work?

The resonance energy transfer caused by the ceramic ores helps reduce acids and formation of free radicals. This characteristic allows beverages to be rid of contaminants that can affect its taste, improving flavor without use of additives. The PursaLite is a healthy choice that's both affordable and convenient.

## Enhance All of your Favorite Beverages with PursaLite™, including:

water ♦ juices ♦ energy drinks ♦ teas  
cocoa ♦ alcoholic drinks ♦ coffee ♦ wine  
soft drinks ♦ nutritional drinks ♦ soups

### Directions

Wash the PursaLite™ thoroughly with a mild detergent and soft brush and rinse prior to its first use, and periodically as well. Rinse with water after each use to keep the stainless steel coil and ores clean and sanitary. PursaLite™ is made using high-quality food grade stainless steel and proprietary ceramic ores of natural and organic minerals.

Please keep out of reach of children.
